

The philosophy of Executive Chef René Mathieu

“All my plates are born based on both a technical and a sentimental expression. Today, I create my recipes from my emotional moments that nourish my passion and my creativity. Every encounter with our nature is like magic, every pleasant moment of my life, can be at the origin of a new recipe. For me, my kitchen is like a source of pleasure and well-being that I like to share!

Like in love, we must indulge with delight, we must take the time to listen to move forward and enjoy the keys of happiness that we encounter in our daily work. Our philosophy is to create desire. By gestures, different tastes, different looks, words and sounds. My kitchen is like an adventure, a treasure hunt, with lots of respect for our nature and the product itself.”
